

"Smarter Solutions is the only vendor I recommend for Six Sigma Black Belt training. Compared to competitors, their S4/IEE approach provides the best integration, tool set, training and guidance. My Black Belt training has been beyond beneficial, as it has given me a competitive edge over all my peers."

Stephen Tutt

"I would like to commend Smarter Solutions and you [Forrest Breyfogle] for the quality and depth of the Smarter Solutions Black Belt Program. The first two weeks have been very enlightening and have provided a wealth of information for continual improvement. I thought that I had a pretty good understanding of the tools and techniques for improvement, but your sessions have given me some greater insight and additional tools to make the approach more systematic and effective. I'm looking forward to the next two weeks of class to obtain some additional knowledge about the methods.

I would also like to compliment you on your class design and your teaching methods. You have made the classes very applicable and relevant, regardless of whether you're in manufacturing, transactional or service based businesses. You have a very personal teaching style which I find to be very helpful in light of some the difficult concepts you are trying to convey. Your expertise and background is excellent and you provide some insightful examples. Thanks again for the class. It is well worth the time and expense."

"It has been a great experience to work with you gentlemen at Smarter Solutions. I have found no small amount of use for the basic themes in our course in lots of applications that I am managing. And as I have mentioned many times, the roadmap is an invaluable aid in practical approach to answering critical management questions. I look forward to our future correspondence."

As I have continued to use the teaching and learnings from your Lean Six Sigma Black Belt course, the more convinced I am that Six Sigma and your approach to it are an excellent way to provide value to our business. I have been involved in quality (ISO 9000) systems implementations, IT, and other improvement processes, but the data driven, and practical statistical applications of your Smarter Solutions stand above the rest.

Continued success, and I hope to be able to apply for MBB in a year or so!
